ANNUAL STATEMENT FOR THE YEAR 2020 OF THE STANDARD LIFE INSURANCE COMPANY OF NEW YORK
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices

The Standard Life Insurance Company of New York (the "Company") was licensed in New York in 2000. The Company currently markets group life and accidental death and dismemberment insurance, group and individual disability insurance, group dental and group vision insurance, group accident only and specified disease insurance, and family leave and absence management products in New York through brokers and its own representatives.

The accompanying statutory basis financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the New York State Department of Financial Services ("Department"). Only statutory accounting practices so prescribed or permitted by the State of New York can be used in determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under New York Insurance Law.

The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual, version effective March 2017 ("Accounting Manual") has been adopted by the Department as a component of prescribed or permitted accounting practices under Regulation 172, Financial Statement Filings and Accounting Practices and Procedures, Part 83 of Title 11 of the Official Compilation of Codes, Rules and Regulations of the State of New York dated December 27, 2000, and revised May 17, 2017. The Accounting Manual contains Statements of Statutory Accounting Principles ("SSAP"). Section 83.4 of Regulation 172 ("the Insurance Law") details those SSAPs or sections of the SSAPs that conflict with New York Insurance Law. The Company is affected by some, but not all, of the conflicts detailed in Section 83.4. Those that could have an effect on the Company include the following:

- 1) SSAP No. 6 – *Uncollected Premium Balances, Bills Receivable for Premiums, and Amounts Due From Agents and Brokers*, paragraph 9(a) is adopted except that Section 1301(a)(11) of the Insurance Law provides that overdue premiums due from the United States government or any of its instrumentalities shall be admitted assets.
- 2) SSAP No. 16R – *Electronic Data Processing Equipment and Software*, is not adopted. Section 1301(a)(18) of the Insurance Law shall apply. Electronic data processing equipment constituting a data processing, record keeping, or accounting system shall be an admitted asset if the cost of such system exceeds \$50,000. The cost may be amortized over a period not to exceed ten years. Non-operating system software shall be nonadmitted and depreciated over the lesser of its useful life or five years.
- 3) SSAP No. 20 – *Nonadmitted Assets*, paragraph 4(c) is adopted except that Section 1411(f)(1) and (2) of the Insurance Law prohibits loans to officers or directors.
- 4) SSAP No. 25 – *Affiliates and Other Related Parties*, paragraph 5 is not adopted. Section 1501(c) of the Insurance Law provides that the superintendent may determine upon application that any person does not, or will not upon the taking of some proposed action, control another person. In addition, paragraph 7 is adopted except that Insurance Law prohibits loans to officers or directors.
- 5) SSAP No. 29 – *Prepaid Expenses*, is not adopted. Sections 1301(a)(9) and 1302(a)(2) of the Insurance Law shall apply. The unaccrued portion of real estate property taxes paid prior to the due date shall be an admitted asset.
- 6) SSAP No. 37 – *Mortgage Loans*, paragraph 14 is not adopted. Section 1301(a)(7) of the Insurance Law shall apply. Interest due or accrued on any real estate mortgage loan which is an admitted asset, in an amount not exceeding the excess of the value of the property (less delinquent taxes) over the unpaid principal amount of the loan unless such interest or taxes due are in default more than 18 months, is an admitted asset.
- 7) SSAP No. 40R – *Real Estate Investments*, paragraph 8 is not adopted. Depreciation on real estate investments owned by life insurers shall be computed at a rate no greater than two and one-half percent per annum, in accordance with Section 1405(b)(1)(C) of the Insurance Law.
- 8) SSAP No. 97 – *Investments in Subsidiary, Controlled, and Affiliated Entities*, paragraph 6 is not adopted. Section 1501(c) of the Insurance Law provides that the superintendent may determine upon application that any person does not, or will not upon the taking of some proposed action, control another person.
- 9) SSAP No. 61R – *Life, Deposit-Type and Accident and Health Reinsurance*, paragraph 60 is not adopted. Under Section 1302(a)(1) of the Insurance Law, all goodwill resulting from assumption reinsurance transactions shall be nonadmitted.
- 10) SSAP No. 101 – *Income Taxes*, paragraph 9 is not adopted. A refund due from the Treasury should be collectible within a brief period after the statement date, in order to be considered an admitted asset. A balance due as a result of participation in a consolidated tax return should be paid over promptly by the parent.

The Superintendent of Financial Services of the State of New York has the right to permit other specific accounting practices that deviate from prescribed practices. The Company has no specific permitted accounting practices.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates. Beginning in the first quarter of 2020, the outbreak of the novel coronavirus ("COVID-19") has resulted in stress and disruption in the global economy and financial markets, and has adversely impacted, and may continue to adversely impact the Company's consolidated financial statements, estimates and assumptions.

C. Accounting Policy

Life premiums are recognized as revenue over the premium paying period of the related policies. Accident and health ("A&H") premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

The liability for experience rated refunds ("ERRs") is estimated at the end of each reporting period for retrospectively rated contracts based on the loss experience of the insured group during the term of the policy (including loss development after the term of the policy) and the stipulated formula set forth in the policy. The change in the liability for ERRs is recorded as an adjustment to premium income for the reported period.

For all investments, impairments are recorded when it is determined that the decline in fair value of an investment below its amortized cost basis is other-than-temporary. The Company recognizes other-than-temporary impairments in net realized capital losses and permanently adjusts the book value of the investment to report the impairment. Factors considered in evaluating whether a decline in value is other than temporary include: (i) the length of time and the extent to which the fair value has been less than amortized cost, (ii) the financial conditions and near-term prospects of the issuer, and (iii) the Company's intent and ability to retain the investment for a period of time sufficient to allow for any anticipated recovery in market value. In addition, for securities expected to be sold, an other-than-temporary impairment is recognized if the Company does not expect the realizable market value of a security to recover to amortized cost prior to the expected date of sale. Once an impairment has been recorded, the Company continues to review the other-than-temporary impaired securities for further potential impairment on an ongoing basis. The Company records temporary impairments and the allowance for loan losses as unrealized capital losses.

The Company uses the following additional accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds ("fixed maturity securities") not backed by other loans and mandatory convertible securities are generally stated at amortized cost using the scientific (constant) yield to worst method, which is determined by the call or maturity date which produces the lowest asset value unless the fixed maturity securities have a NAIC designation of 6, which are stated at the lower of amortized cost or fair value. The Company held no SVO-Identified investments as of December 31, 2020.

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE STANDARD LIFE INSURANCE COMPANY OF NEW YORK
NOTES TO FINANCIAL STATEMENTS

- (3) The Company owned no common stock as of December 31, 2020.
- (4) The Company owned no preferred stock as of December 31, 2020.
- (5) Mortgage loans are stated at the unpaid principal balance adjusted for unamortized discounts, premiums and allowance for losses.
- (6) Loan-backed and structured securities are carried at either amortized cost or the lower of amortized cost or fair value in accordance with the provisions of SSAP No. 43R – *Loan-Backed and Structured Securities*. For loan-backed and structured securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources. Significant changes in estimated cash flows from the original purchase assumptions are generally accounted for using the prospective method.
- (7) The Company owned no investments in any subsidiaries, controlled and affiliated companies as of December 31, 2020.
- (8) The Company owned no investments in any joint ventures, partnerships or limited liability companies as of December 31, 2020.
- (9) The Company held no derivatives as of December 31, 2020.
- (10) Should the Company determine the need for premium deficiency reserves, investment income would be anticipated as a factor in the premium deficiency calculation, in accordance with SSAP No. 54R – *Individual and Group Accident and Health Contracts*.
- (11) Claim liabilities for accident and health policies are established using a combination of industry morbidity tables and company adjusted formulas. The present value of future benefits is calculated for each claim reported and approved. Interest rates are reviewed annually as determined by the Department and NAIC model guidelines. Incurred but not reported (“IBNR”) reserves are established at the policy level and formulas are reviewed as appropriate to ensure that reserve run-outs demonstrate sufficient adequacy. Claim adjustment expenses for accident and health policies are developed using estimates of expected claim duration and administration costs based on company experience. Future costs are adjusted for inflation.
- (12) The Company has not modified its capitalization policy from the prior period.

D. Going Concern

Management does not have any substantial doubt about the Company’s ability to continue as a going concern.

2. ACCOUNTING CHANGES AND CORRECTION OF ERRORS

Accounting Changes

On April 15, 2020, the NAIC issued *INT 20-03: Troubled Debt Restructuring Due to COVID-19* (“INT 20-03”). This interpretation clarifies that a modification of mortgage loan or bank loan terms in response to COVID-19 shall follow the provisions detailed in the April 7 “Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus” and the provisions of the federal Coronavirus Aid, Relief, and Economic Security (CARES) Act in determining whether the modification shall be reported as a troubled debt restructuring. Mortgage loan modifications that were compliant with INT 20-03 were not material to the Company with modifications related to capitalized deferred interest reported on Schedule B – Part 3.

The Company does not believe that any of the fixed maturity securities are impaired due to credit quality or due to any company or industry specific event. 16. INFORMATION ABOUT FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK AND FINANCIAL INSTRUMENTS WITH CONCENTRATIONS OF CREDIT RISK

The Company did not have financial instruments with off-balance sheet risk as of December 31, 2020 or 2019.

Financial Instruments with Concentrations of Credit Risk

The Company's fixed maturity securities totaled \$134.4 million as of December 31, 2020. The Company maintains prudent diversification across industries, issuers and maturities. A potential ratings downgrade of U.S. government securities could lead to future deterioration in the U.S. and global credit and financial markets. As a result, these events may materially adversely affect the Company's financial condition and results of operations. The weighted-average credit quality of the Company's fixed maturity securities investment portfolio was A- (Standard & Poor's) as of December 31, 2020. The Company held \$3.8 million and \$2.0 million of fixed maturity securities below investment grade as of December 31, 2020 and December 31, 2019, respectively.

As of December 31, 2020, commercial mortgage loans in the Company's investment portfolio totaled \$133.0 million. Commercial mortgage loans in California accounted for 26.1% of the Company's commercial mortgage loan portfolio.

Due to the concentration of commercial mortgage loans in California, the Company could be exposed to potential losses as a result of an economic downturn in California as well as certain catastrophes, such as earthquakes and fires, which may affect the region. Borrowers are required to maintain fire insurance coverage. The Company considers the potential for earthquake loss based upon specific information to each property within the western region by both location and type of property in an effort to reduce certain earthquake exposure. However, such diversification may not always eliminate the risk of such losses, which could have a material adverse effect on the Company's business, financial position, results of operations or cash flows.

Concentration of borrowers and tenants in the Company's commercial mortgage loan portfolio may expose the Company to potential losses resulting from a downturn in the economy, business performance of tenants, or adverse changes in a borrower's financial condition. Although the Company diversifies the commercial mortgage loan portfolio by location, type of property, borrower and tenants, such diversification may not eliminate the risk of such losses, which could have a material adverse effect on the Company's business, financial position, results of operations or cash flows.

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE STANDARD LIFE INSURANCE COMPANY OF NEW YORK
NOTES TO FINANCIAL STATEMENTS

The Company is subject to default risk on its fixed maturity securities portfolio and its corresponding impact on credit spreads. The Company's commercial mortgage loan portfolio is subject to delinquency, default and borrower concentration risks. Related declines in market activity due to overall declining values of fixed maturity securities may result in the Company's fixed maturity securities portfolio becoming less liquid. In addition, the Company's commercial mortgage loans are relatively illiquid. The Company may have difficulty selling its fixed maturity securities and commercial mortgage loans at attractive prices, in a timely manner, or both if significant amounts of cash are required on short notice.

20. FAIR VALUE MEASUREMENTS

A. (1) The Company did not have any assets or liabilities reported at fair value on a recurring basis as of December 31, 2020.

(2) The Company did not have any assets or liabilities categorized within Level 3 of the fair value hierarchy on a recurring basis as of December 31, 2020 and 2019.

(3) Commercial mortgage loans measured for impairment were valued using Level 3 inputs with the inputs evaluated and reviewed for reasonableness by management on a quarterly basis. The commercial mortgage loan measurements included valuation of the market value of the asset using general underwriting procedures and appraisals. These amounts may be adjusted in a subsequent period as additional market information is obtained.

(4) Valuation techniques and inputs used in the fair value measurement for assets and liabilities.

Assets and liabilities recorded at fair value are disclosed using a three-level hierarchy. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable. Observable inputs reflect market-derived or market-based information obtained from independent sources while unobservable inputs reflect the Company's estimates about market data.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels: Level 1 inputs are based upon quoted prices in active markets for identical assets or liabilities that the Company can access at the measurement date. Level 2 inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market. Level 3 inputs are generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's estimates of assumptions that market participants would use in pricing the asset or liability.

There are three types of valuation techniques used to measure assets and liabilities recorded at fair value:

- The market approach uses prices or other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- The income approach uses the present value of cash flows or earnings.
- The cost approach uses replacement costs more readily adaptable for valuing physical assets.

The Company uses both the market and income approach in its fair value measurements. These measurements are discussed in more detail below.

Fixed Maturity Securities

Fixed maturity securities were comprised of the following bond classes:

- U.S. government.
- U.S. political subdivisions.
- U.S. special revenues.
- Industrial and miscellaneous (unaffiliated).

The fixed maturity securities were diversified across industries, issuers, and maturities. The Company calculates fair values for all fixed maturity securities using valuation techniques described below. They are placed into three levels depending on the valuation technique used to determine the fair value of the fixed maturity securities.

The Company uses independent pricing services to assist management in determining the fair value of these assets. The pricing services incorporate a variety of information observable in the market in its valuation techniques, including:

- Reported trading prices.
- Benchmark yields.
- Broker-dealer quotes.
- Benchmark securities.
- Bids and offers.
- Credit ratings.
- Relative credit information.
- Other reference data.

The pricing services also take into account perceived market movements and sector news, as well as a fixed maturity security's terms and conditions, including any features specific to that issue that may influence risk, and thus marketability. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary.

The pricing services provide quoted market prices when available. Quoted prices are not always available due to fixed maturity security market inactivity. The pricing services obtain a broker quote when sufficient information, such as security structure or other market information, is not available to produce a valuation. Valuations and quotes obtained from third-party commercial pricing services are non-binding and do not represent quotes on which one may execute the disposition of the assets.

The significant unobservable inputs used in the fair value measurement of the reporting entity's fixed maturity securities are valuations and quotes received from analytical reviews and broker quotes. Significant increases or decreases in any of those inputs in isolation would result in a significantly lower or higher fair value measurement.

The Company performs control procedures over the external valuations at least quarterly through a combination of procedures that include an evaluation of methodologies used by the pricing services, analytical reviews, back testing of sales activity and maintenance of a securities watch list. When necessary, the Company compares prices received from the pricing services to prices independently estimated by the Company utilizing discounted cash flow models or through performing independent valuations of inputs and assumptions similar to those used by the pricing service in order to ensure prices represent a reasonable estimate of fair value. Although the Company does identify differences from time to time as a result of these validation procedures, the Company did not make any significant adjustments as of December 31, 2020 or December 31, 2019.

Commercial Mortgage Loans

For disclosure purposes, the fair values of commercial mortgage loans were estimated using a discounted cash flow valuation. The valuation includes both observable market inputs and estimated model parameters.

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE STANDARD LIFE INSURANCE COMPANY OF NEW YORK
NOTES TO FINANCIAL STATEMENTS

Significant observable inputs to the valuation include:

- Pricing for loans originated by StanCorp Mortgage Investors during the most recent quarter.
- U.S. Government treasury yields.
- The contractual terms of nearly every mortgage subject to valuation.

Significant estimated parameters include:

- The use of risk characteristics including stabilized debt coverage ratio and loan-to-value ratio.
- Variations in valuation spread between loans based on individual risk characteristics.

Valuations for commercial mortgage loans measured at fair value on a nonrecurring basis using significant unobservable Level 3 inputs are sensitive to a number of variables, but are most sensitive to net operating income and the applied capitalization rate. Generally, an increase or decrease resulting from a change in the stabilized net operating income from the collateralized property would result in a directionally similar change in the fair value of the asset. An increase or decrease in the assumption for the capitalization rate would result in a directionally opposite change in the fair value of the asset.
